

## COVID-19 Ship to Shore Interface Protocols

- E-mail confirmation 24 hrs prior berthing that no one on board is experiencing symptoms of covid-19.
- Vigilant respect of 2 metre distancing between crew members and stevedores at all times (we strongly recommend that ship's crew use the water side deck passage and that stevedore's use the dock side deck passage)
- Vessel gangway monitor will be supplied with a list of all boarding stevedores in order to avoid a physical sign-in.
- As much as is possible, all documents between ship and shore will be transmitted by e-mail through the ship's agent.
- Stevedore's to endeavor not to enter ship's accommodations so we request that a duty officer is always stationed outside and readily accessible.
- Vessel to exercise extreme care in keeping crane cabins sanitized and windows clean prior to commencement of work shifts. N/A
- Below you will find a link to our website with standard Valport covid-19 instructions.
